

How to Safely Remove Reusable Gloves

1.

Wash the outsides of gloves with soap and warm water.

2.

With one gloved hand, grasp the fingers of the other glove slowly pulling the glove downward.

3.

Alternate between each glove, continuing to pull them downward until both gloves are removed.

4.

Grasp the gloves at the wrist and set on a clean surface.

5.

Thoroughly wash hands after removing gloves.

6.

Place dry gloves in a sealed bag or container and store away from pesticides.
