

**OSU CFAES Equipment Safety Training Test** Name: \_\_\_\_\_

Date: \_\_\_\_\_

Supervisor: \_\_\_\_\_

**1. Before using a piece of agricultural equipment you should:**

- A) understand the hazards associated with the piece of equipment
- B) recognize and follow the hazard warning labels on the equipment
- C) respect the speed and power of the equipment
- D) all of the above

**2. True or False? A piece of equipment can have multiple hazards that can cause injuries.**

- A) True
- B) False

**3. Pinch point hazards can include:**

- A) belt and pulley
- B) chain and sprocket
- C) cutter bar assemblies
- D) Both A and B

**4. True or False? Cut point hazards can involve two blades moving across each other or a moving single blade.**

- A) True
- B) False

**5. Stored energy includes?**

- A) electricity
- B) hydraulic systems
- C) spring tension
- D) all of the above

**6. The most common injury hazard from an object being thrown from equipment is:**

- A) cuts to the fingers and hands
- B) chemical burns
- C) being struck by the object at a high velocity
- D) getting entangled in the equipment

**7. True or False? Injuries from “Free-Wheeling Parts occur when the equipment is fully operational and at full power.**

- A) True
- B) False

**8. The most common injury hazard from a wrap point on a piece of equipment is:**

- A) cuts to the fingers and hands
- B) burns to the body
- C) puncture wounds
- D) getting entangled in the equipment

**9. To prevent crush point injuries:**

- A) Never walk under a raised load
- B) Wear gloves and safety glasses
- C) Use cylinder locks when working under equipment
- D) Both A and C

**10. True or False? Being distracted or not paying attention can lengthen your reaction time to a potential hazard.**

- A) True
- B) False
