Flexible cords, including extension cords and power strips, are easily damaged because they are exposed and unsecured. Misuse of flexible cords can result in serious injuries or damage to property. These safety guidelines promote effective and safe use of flexible cords.

**DO NOT MODIFY FLEXIBLE CORDS**

Extension cords and power strips should only be used for their intended purpose. Electrical work related to research or student projects must be approved by a qualified person.

**INSPECT CORDS PRIOR TO USE**

Dispose of cords that are cracked or frayed, missing prongs, or otherwise damaged. Do not attempt to repair.

**DO NOT OVERLOAD POWER STRIPS**

Power strips should not be linked together or used in conjunction with an extension cord. High current equipment, such as appliances, should be plugged directly into a wall outlet.

**FLEXIBLE CORDS ARE DESIGNED FOR TEMPORARY USE**

Do not use cords as replacements for fixed wiring, or fasten cords or power strips to building surfaces or furniture.
