

Tractor Safety

Safe Operation

- Inspect the tractor each day before use
- Use 3 points of contact when mounting & dismounting

Tractor Stability

- Keep center of gravity within wheels
- Center of gravity changes with attachments & sloped turning

PTO Entanglement

- Stay clear of moving parts
- Ensure shields & guards are in place

Runovers

- Do not allow riders
- No by-pass starting
- Watch out for pedestrians

Lighting & Marking

- Use proper lighting for highway
- Properly mount & clean SMV

Rollover

- Avoid high speed turns
- Keep your distance from embankments
- Hitch to draw-bar or 3-point hitch
- Fasten seat belt & ensure the Roll Over Protective Structure (ROPS) is up
