

Prevent Mosquito-borne Diseases

Fight the Bite! Drain. Avoid. Spray.

Eliminate backyard breeding sites!

Keep gutters flowing and clean of debris

Seal or screen all rain barrel openings and treat with mosquito dunks monthly

Clean bird baths once a week

Keep ornamental pots and plant saucers free of standing water

Keep Fathead minnows or Rosy-reds in ornamental ponds

Keep swimming pools clean and covered

Cover open boats; eliminate any water collecting in tarp depressions

Repair leaking watering equipment

Store anything that holds water for more than a few days and drill drain holes in tire swings

Use window screens and repair holes

AND ENVIRONMENTAL SCIENCES

Protect Yourself from Biting Mosquitoes

- Wear long, loose and light-colored clothing
- Use insect repellent with DEET, Picardin or lemon-eucalyptus oil
