

Why Should I Use PPE?

Eye Protection

Protects from flying particles; contact with chemicals; fluid under pressure

Respiratory Protection

Prevents inhalation of potentially hazardous substances such as dust or chemical vapors

Hand Protection

Prevents cuts; slivers/punctures; chemical exposures; heat/cold; electricity; biological hazards

Foot Protection

Protects from impact from falling or rolling objects; punctures from stepping on sharp objects; electricity; slippery or uneven surfaces

Head Protection

Protects head from impacts

Hearing Protection

Protects from excessive noise

Body Protection

Protects from temperature extremes; hot splashes; potential impacts; hazardous materials

Fall Protection

Use whenever working at a height of 4 feet or above
